#### General accounting principles for the preparation of the financial statements

The financial statements have been prepared in accordance with generally accepted accounting standards as set forward in the Netherlands Civil Code.

Valuation of assets and liabilities and determination of the result takes place under historical cost conventions. Unless presented otherwise, the relevant principle for the specific balance sheet item, assets and liabilities are presented at face value.

Income and expenses are accounted for on accrual basis. Profit is only included when realized on balance sheet date. Losses originating before the end of the financial year are taken into account if they have become known before preparation of the financial statements.

#### Translations of foreign currency

Receivables, liabilities and obligations denominated in foreign currency are translated at the exchange rates prevailing at balance sheet date.

Transactions in foreign currency during the financial year are recognized in the financial statements at the exchange rates prevailing at transaction date. The exchange differences resulting from the translation as of balance sheet date are recorded in the profit and loss account.

## **Principles of valuation of assets and liabilities**

### **Receivables**

Receivables are included at face value, less any provision for doubtful accounts. These provisions are determined by individual assessment of the receivables.

### **Stock**

We have discussed with the board the stock position of books. As these books stocks are widely spread across Europe amongst several people and locations, it is undoable to make proper inventory each year.
