

Conference co-chairs

Nicol Voermans, MD PhD, Radboud University & Stephen Tapscott, MD PhD, University of Washington

The FSHD Society's annual FSHD International Research Congress is the premier global conference focused on facioscapulohumeral muscular dystrophy (FSHD) research. With the recent advances in FSHD research and clinical advances, this conference has become catalytic in translating ideas into potential therapies.

KEYNOTE SPEAKERS

- Karen Chen, PhD, CEO of the SMA Foundation, will reflect on lessons learned from the history-making development of treatments for spinal muscular atrophy.
- L.A. (Leendert) Trouw, PhD, Leiden University Medical Center, will discuss fundamental, translational and clinically oriented research on complement and (auto)antibodies.

CALL FOR ABSTRACTS

- Mechanisms of disease & interventional strategies. Session heads: Marnie Blewitt & Kyoko Yokomori
- Genetics and epidemiology. Session heads: Cristiane Moreno & Vishnu VY
- Measurements of disease. Session chairs: Seth Friedman & Giorgio Tasca
